

OCTEK PERFORMANCE RTX 4U WORKSTATION BUILT FOR WHAT MATTERS

Configured and built in-house by the Octek team, the Performance RTX 4U Workstation is fully customisable to your organisation's exact needs — no compromises, no off-the-shelf limitations. Rack-mountable with sliding rails, it's built to integrate seamlessly into any professional environment and keep running under pressure, backed by a 3-year warranty. With dual GPU capability, it's a natural fit for AI and machine learning workloads, as well as security and surveillance applications — powering video analytics, large camera networks, and intelligent detection software with ease. Powerful, reliable, and uniquely yours.
